

# INDUSTRIAL VALVES & INSTRUMENTS

Version 22

**AXEL LARSSON** 

# Welcome to Axel Larsson, one of Scandinavia's leading valve suppliers with a wide range of international clients.

Our mission is to supply the Scandinavian and Baltic market with quality products in and around piping systems, for the control and measuring of fluids. We specialize in industrial valves, instruments and valve automation solutions.

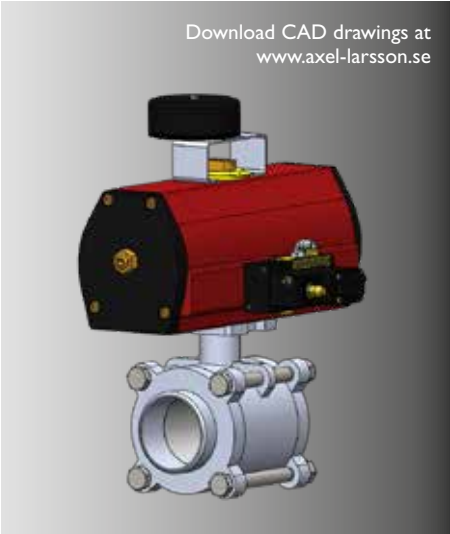

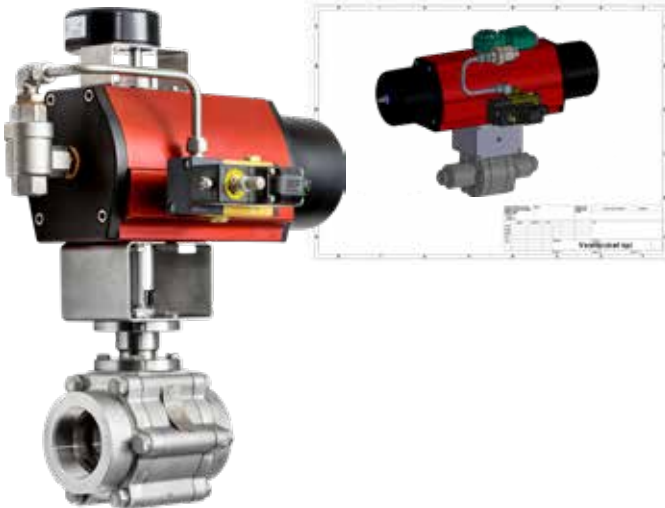

Thanks to our extensive background in just about any industrial process, we meet the highest industry requirements and can provide customized valve assemblies for your specific needs.

We offer one of the largest 3D CAD valve libraries in Scandinavia and have also developed intelligent, time-saving software solutions for AutoCad Plant 3D. Additionally, we undertake valve servicing and engineering assignments in a wide range of fields such as construction drawings, long-term testing and X-ray inspection.

We are ISO 9001 quality compliant and represent some fifty leading manufacturers based in Europe, Asia and the United States.

Established in 1949, we are now a third-generation family enterprise. We'd love to help you in your operations, and we'll be happy to assist with solving any issues you might face in your specific field, including special applications and technical challenges in new projects.

Do not hesitate to contact us. We are here to help you move forward.
